

Country of Origin Declaration (Non-Preferential Treatment)

Dear Customer,

Customs requires documentation that reflects an accurate country of origin for the commodities contained within. This is not necessarily the country where the shipment was sent from, but is the country where the commodity was manufactured.

Country of origin is correctly determined by applying the applicable Rules of Origin as follows:

1. The country where the good was wholly obtained or produced; or
2. The country where the good is produced exclusively from domestic materials; or
3. Each foreign material used in the manufacture of the finished component undergoes a significant transformation
4. For goods where the country of origin cannot be determined based on the rules detailed in steps 1-3, the country of origin for the good will be the origin of the single material that imparts the essential character to the good.
